

## ***THE MOBILE DAIRY*** ***Innovative ethical project***

***self-energetic structure through thermo-photovoltaic systems.***

*An integrated solution of innovative technologies for goat farming with a mobile dairy for milk processing and cheese production, independent, thanks to solar energy, of the presence of drinking water and or the power lines*

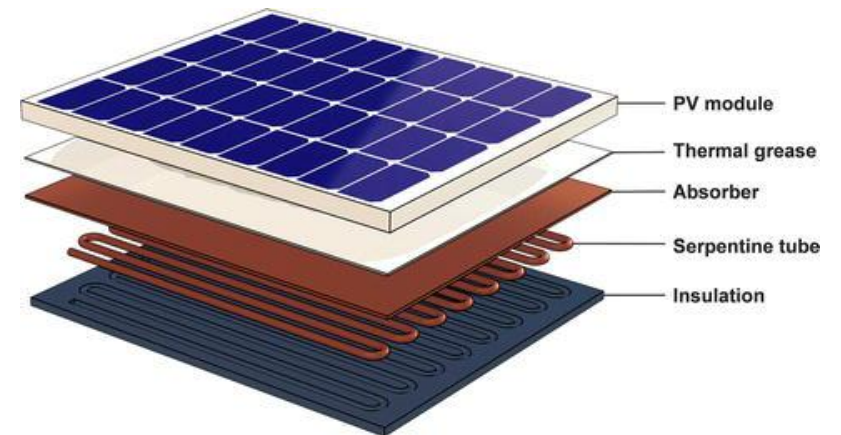

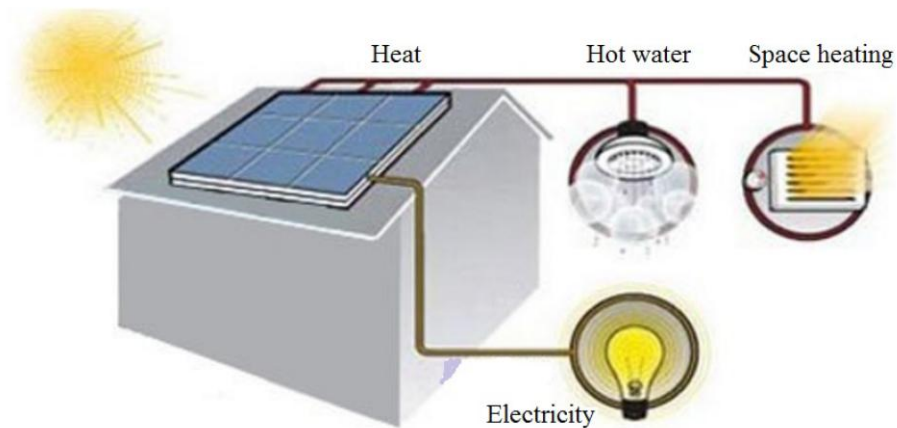

***PV+ THERMAL = Hybrid solar panels system***

***The treatment system for well or river water to make it drinkable with osmosis technology.  
It is able to produce 210 liters daily of drinking water with mineral salts.***

***A special machine to produce Drinking Water from the air which harnesses a water-condensing material that biomimetic the abilities of species such as thorny devil lizards.***

*Training courses for goat breeding and cheese production are available with Italian entrepreneurs who will bring their great experience with the direct presence on site.*
